

Name: Brett Rudolph

Class of works: I am writing in support of Class #2 (DVD Region Coding):  
Audiovisual works stored on Digital Versatile Disks ("DVDs") that are not  
available in Region 1 DVD format and access to which is prevented by  
technological measures.

Summary:

Disc name: Amelie

I am requesting an exemption to the DCMA for region coding restrictions. The DVD Amelie was a gift from a friend in Europe, and it was released in Europe before the US version came out. Since I already own this European version, why should I have to buy the U.S. version as well? The movie was not compatible with my computer's DVD player. I needed a region-free player, which is not available to Linux due to DECSS not being legal to use.
